# KSC Newsletter

**Knowledge Sharing Campaign (KSC)** is a community platform that brings together two groups of people: the Know & Can Teach group (those who have experience and can share their knowledge) and the Don't Know & Can Learn group (those who are eager to learn, but lack opportunities). A KSC ambassador should become a world changer, that spreads the example of a platform of collaborative learning experience that crosses disciplines and merges ideas to create new thinking for a new world.

## KSC's Mainstream Program

- A. Internship Program**
- B. Hands-on Training Workshops**
- C. Entrepreneurship and leadership development seminars**

## Our Founder

**Dr. Charles Lebon Mberi Kimpolo:** Director, AIMS Industry Initiative, African Institute for Mathematical Sciences - Next Einstein Initiative (AIMS-NEI).

Charles's passion in Education, especially for the African youth, motivates him to persistently seek opportunities to use technology and promote excellence in Quality Education in Africa. It is widely recognised on the continent that poor education and lack of access to technology are major stumbling blocks to economic competitiveness and social equality. As feeder subjects for a career in IT, the low quality of maths and science education in Africa is alarming. With this in mind, Charles launched the Young African Technologists (YAT) initiative that is aimed at promoting education through technology in underprivileged African communities. During his 2-year stay in India, he supported African students through the Knowledge Sharing Campaign (KSC) that he founded to empower the African student diaspora and reverse brain drain.

In order to continue our activities and to transmit our experience gained in INDIA on the opportunities to access a Quality Education through new technologies and promote a social change. In accordance with the Law of 1 July 1901 on Associations, we young Congolese have decided to create an apolitical and secular NGO called **Knowledge Sharing Campaign (KSC)**.

## Value Of Knowledge !

## Message From The Co-founder

In his words of circumstance, the Co-founder, [Paulcy](#) made the participants aware of the imperious the need to create a Platform that brings together passionate new technologies, professionals and congolese students. Those who wish to share their knowledge, experiences and train others. This Platform aims to promote excellence in education and bring socio-economic justice in Congo.

*“...We believe we are achieving this goal through the use of modern technologies.”*

Indeed, he continued, a community without access to modern technologies cannot compete internationally. Let us bring together young Africans from different countries, different cultures, religions, languages and cultures; let us use new technologies to create a culture of love of education and unity among Africans. In addition to the objectives clearly defined in the Statutes and the Rules of Procedure, we intend to offer young congolese all the ways and methods of self-employment.

With our slogan **‘Bring, Share & Learn’**, and we thought that **“The best way to evaluate our knowledge is to share it with others and evaluate feedback”**.

Thus in an atmosphere of friendship and brotherhood Participants unanimously decided to form a non-political Non-Governmental Organization called KNOWLEDGE SHARING CAMPAIGN (KSC), for the Francophone Africa region.

**Mr. Des Merveilles Paulcy MBOUNGOU** is a passionate young African who believes in the Power of Quality Education. He was selected from over 2000 high-potential candidates to undergo a course in *Big Data, Machine Learning and Design Thinking*, among others. His experience delivering software using Agile at ThoughtWorks has taught him how best to implement Agile, and its benefits. Working with ThoughtWorks has given him the experience and confidence to work in an agile, dynamic, fast-paced. He’s the **NEF Ambassador 2019-2021** to the Republic of Congo and Co-founder of **MALAMU | Your Mobile Passport to Health**.

---

## African Institute for Mathematical Sciences - Next Einstein Initiative (AIMS-NEI)

The **African Institute for Mathematical Sciences (AIMS)** is a tertiary education and research institute in [Muizenberg](#), South Africa, established in September 2003, and an associated network of linked institutes in Senegal, Ghana, Cameroon, Tanzania and Rwanda.

### THE NEXT EINSTEIN FORUM

NEF is an AIMS initiative in partnership with Robert Bosch Stiftung and is focused on convening Africa's innovators to highlight breakthrough discoveries and catalyse scientific collaboration for human development. The NEF is a unique youth-driven forum. Our headline biennial scientific events, NEF Global Gatherings' participants are 42 or younger. Far from an ordinary science forum, the NEF Global Gatherings position science at the centre of global development efforts. In addition, through our Communities of Scientists, we showcase the contributions of Africa's brilliant youth to Africa's scientific emergence through its class of NEF Fellows who are Africa's top scientists and technologists, all under the age of 42 and NEF Ambassadors who are the NEF's 54 science and technology Ambassadors on the ground.

### THE NEF AFRICA SCIENCE WEEK

The NEF Africa Science Week (ASW) was a unique opportunity given to the Africa's youth, to celebrate Science, Technology, Engineering and Mathematics (STEM). Through various STEM activities, ASW provided Africans with a platform to engage the youth who were the target audience. Young Africans had an opportunity to be heard while engaging with senior academicians and professional technologists who shared their different experiences and career paths. Also, this was an opportunity to truly reflect on the role of young Africans in contributing to the development of the continent, through STEM training.

***"... Attending Africa Science Week helped me understand that, STEM is key to prepare young people like myself to adapt into this digital world"***

## **MALAMU | Your Mobile Passport to Health - A Project Of 10 Academy**

MALAMU is a freelancer team based in N°01 [University Ave.](#) Berekuso, Ghana. Our team, is very serious and prepared to present you products or services in elegant and pleasant format through websites designed by us. It is important that your software be clear and concise, that it reflect values and products, in short, the business you drive. Two essential elements are for a good software. First, an excellent design and innovation that ensures a memorable App and encourages viewing beyond the home page. Finally, functionality and program are the basis for software optimization. We offer assistance in relation to the appearance of your App, from the creation of the logo, site design, until the finalization.

Specialized in sectors such as education, health care and IT. The Malamu's Co-founders, called the *Vocal Cords*, have worked with some of the world's largest organizations, such as NEF [Next Einstein Forum]; [VMédia](#) [which is an innovative, fast-growing company based in Toronto, Canada], to develop and implement their projects in Africa, from initial market entry strategies to the launch of new multinational-supported institutions.

### **MALAMU | Your Mobile Passport to Health (Software as a service)**

MALAMU is a service that is provided to civilian patients who seek a more efficient health care delivery system that what which is in current existence. MALAMU is in affiliation with many hospitals around the globe. Through MALAMU online websites and the mobile app, patients are able to book medical appointments. This ensures that the patient wastes no time in long queues. The hospital administration is able to securely store a users medical records such as diagnosis and medical prescriptions into an electronic database. The centralized, electronic database can be assessed by any medical staff from any MALAMU hospital provided the users ID is inputted into the computer. One advantage of this method of data storage is that the patient is able to retrieve his medical record and be offered medical treatment in any geographic location.

Every aspect of patient experience – from confidence in the care provider to perceived service quality – correlates negatively with longer wait times. This dissatisfaction affects not only the patients' mood, but the working environment in general.

---

Quicker service and shorter queues would result in increased productivity, a lower burden of disease and more efficient health care delivery.

---

## 10 Academy

10 Academy enables Africa's highest potential young people to launch their careers with 10x impact. Training with 10 Academy takes place in both; online (on our UpSkill platform) and via a 4-week in-person Fellowship.

10 Academy believes that the brightest young people, equipped with the right tools and the right opportunity can go on to have 10x the impact of their peers. This can happen working as an employee, as an entrepreneur or working in the non-profit sector. This has been demonstrated scientifically in many fields of business, arts and sciences.

10 Academy exists to identify these brightest young people, allowing them to remotely UpSkill themselves, provide them with in-person training and give them opportunities to have 10x impact.

UpSkill is open to anyone from any nationality who is interested in learning new skills in the field of Data Science.

# Knowledge Sharing Campaign (KSC) - For The Francophone Africa Region.

## **Innovations to solve community problems:**

Knowledge Sharing Campaign (KSC) works closely with organizations of all types (and based all over the world) to help them identify exceptional talent to work with their organizations.

Two types of engagement are possible:

1. KSC team will work with you to identify Fellows that fit your role and meet your needs for a 6-month paid internship.
2. KSC partners benefit from deep engagement with the hiring and training process with the ability to have Fellows work on projects of interest to them, hire Fellows (first preference), gain insights into their field of work and gain insights from exceptional young Africans on the growth potential in their sectors.

Partnering with Knowledge Sharing Campaign (KSC) provides businesses with access to some of Africa's highest potential young talent in a reliable, simple and predictable process. There is no obligation to hire interns and there is no obligation to convert internships into full-time positions. KSC team will work closely with organizations to ensure excellent fit between their needs and the Fellows.

Knowledge Sharing Campaign (KSC) is now accepting applications for organizations that wish to partner. To partner KSC, contact us and let us know what roles you're looking to hire for, approximate start date (month/quarter + year) and the level of experience that you're looking for.
